

Is Brad Pitt Symmetrical?

If we assume that a human face has a line of symmetry, what would happen if we reflected one side of Brad's face onto the other side of his face?

Symmetry Bonus Project (optional)

Think: Using what you know about reflection symmetry and the human face, do you think human face symmetry is different in babies, teens and adults? Write your theory:

Explore: Create a symmetrical human face (per computer directions posted on the website) for 3 different stages of life. How does your theory compare with your results? Explain:
